

Key Stage 3 Class News Spring 2024

Things to note for your class

Teachers will continue to inform you if they need any specific items for a student's individual timetables.

We do ask though that your young person brings in a warm, waterproof coat each day for outdoor play and learning.

Thank you.

Topic this Term

Across Key Stage 3 this term, we will be focusing on 'How can we help at home?'

We will be looking at the jobs that need to be undertaken at home and in school. Children will be asked about the jobs they can help out with and ways in which they can be encouraged to be more independent.

Maths will see us focusing on number and looking at odd and even, using number bonds and looking at how we make a total and check our answers. We will then move on to looking at money and how we work out our change.

In Religion, we will be looking at Hinduism and starting to understand how Hindus practice their faith, while in PSHE we will be looking at ways to stay safe, both in real life and online.

After half term, our topic will change to 'What happens inside our body?'. We will look at our digestive system and our skeleton and think about ways in which we can look after our bodies from a healthy life style point of view.

In science this term we will look at what we use electricity for and where it comes from. We will design our own circuits and look at items that use batteries.
